LEADING THE WAY TOGETHER

LEADING THE WAY TOGETHER

Welcome to Maccio Robotics

We are a company that transforms the world through robotization, offering innovative solutions for a variety of human problems.

We imagine a future where technology stands as an inspiring force, catalyzing improvement in the quality of human life, unleashing its potential to overcome challenges and elevate our well-being. We believe in collaboration between humans and robots to tackle diverse projects and forge a better, more resilient and prosperous world for all.

LEADING THE WAY TOGETHER

LEADING THE WAY TOGETHER

PRIMARY GOALS

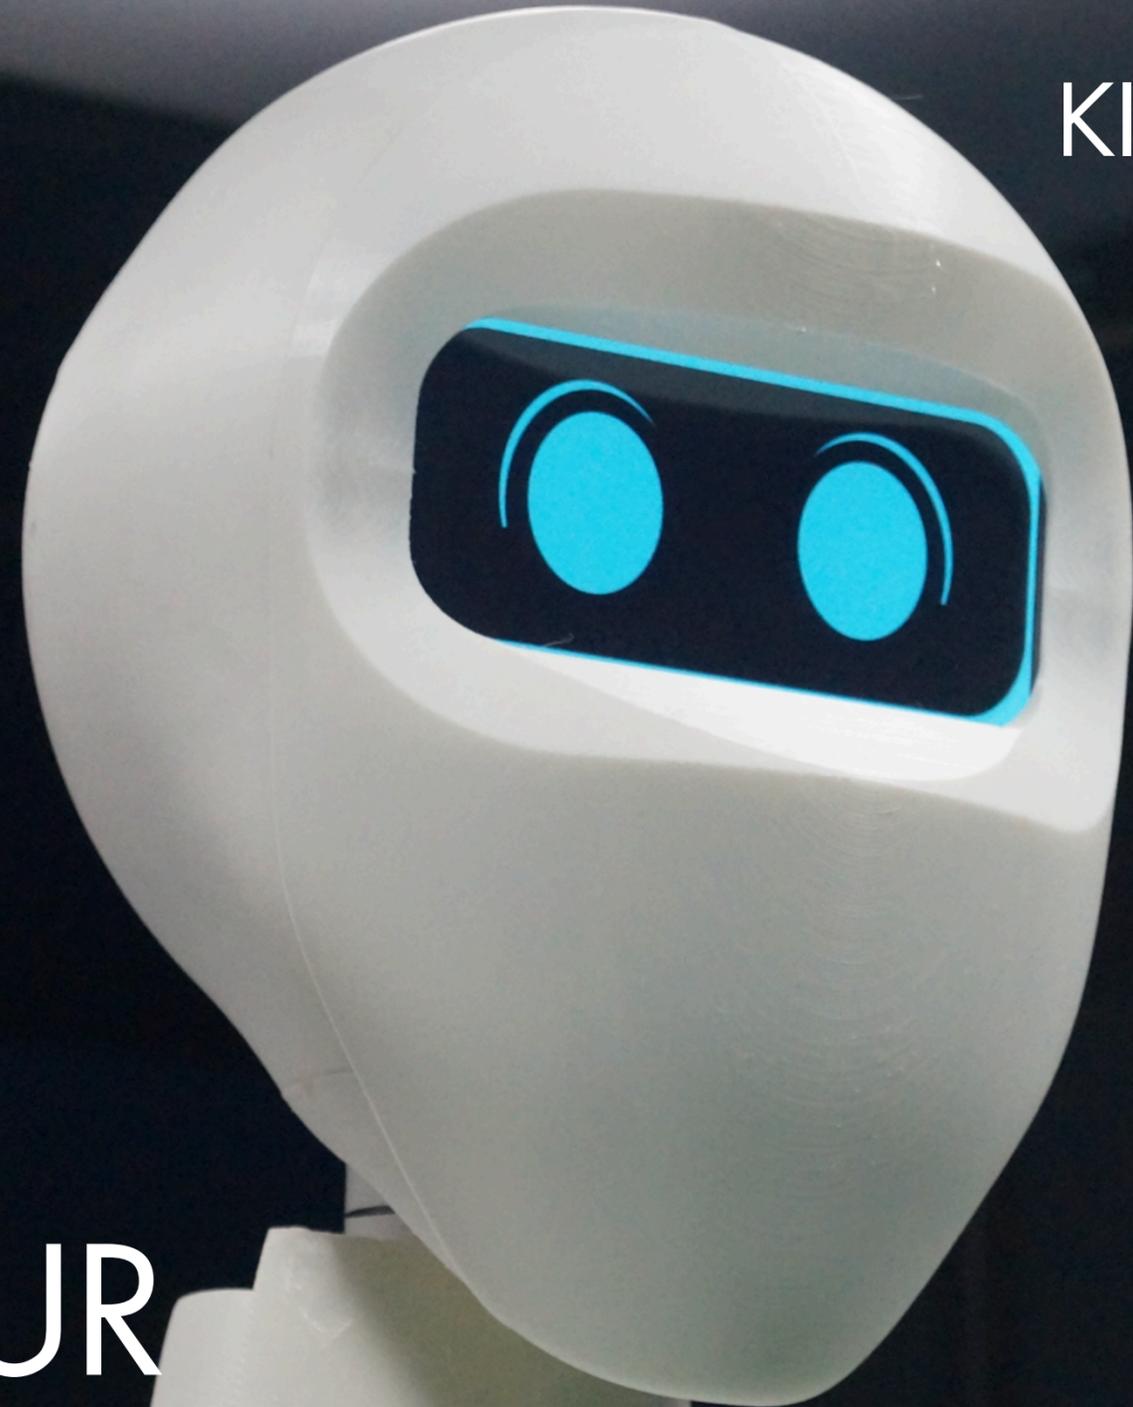

We want to help transform and improve the sector by addressing the three main problems:

- Food waste
- High real estate costs
- Labor (the challenge of finding professionals to work in the industry)

Our robots reduce food waste to "0", require less operating space, and are designed to work 24 hours a day.

LEADING THE WAY TOGETHER

KIME

KIME is a humanoid robot bartender, integrated into a customizable Kiosk, able to serve a wide variety of quality products. It can also be installed inside the bar to work together with the waiters

- 100% control on the quality of drink and food served
- 24 hour working, 7 days a week
- Less space needed for production
